

Your Choice For Great Care

By Gary S. Padgett

You don't get a second chance to make a first impression. It takes just a quick glance, maybe three seconds for someone to evaluate you when meeting for the first time.

Your smile says a lot about you and is usually one of the first things that is noticed. A warm and confident smile will put both you and the other person at ease so smiling is a winner when it comes to great first impressions. A smile can tell those you meet about your personality, confidence, affection, and even sense of humor. If you don't like your smile, then the first impression you are giving off can come across as negative whether you hide your smile behind your hand or avoid large groups of people because you are self-conscious. Don't let your dislike of your smile change the way people think about you!

At Citrus Care Dental, we are dedicated to creating great smiles for you and your entire family. Each and every day we work with patients just like you to help prevent damage and decay, beautify your smile, and restore already damaged teeth. Nothing makes us happier than knowing that we've made a patient truly happy about the work we've done!
