

Gary
S. Padgett, D.D.S.

Dr. Padgett graduated with honors from Loyola University in 1984 where he received his Doctorate of Dental Surgery.

Upon graduation, he joined his father's restorative dental practice that had been providing dental care to the North Shore of Chicago since 1950.

Immediately, Dr. Padgett began furthering his clinical skills by attending post graduate work at the L.D. Pankey Institute, acknowledged as one of the foremost centers for advanced dental education, dedicated to furthering a professional's skills and enhancing the dentist-patient relationship.

He also began providing care and teaching internationally. He continues at present to do this on a part time basis in Thailand.

Dr. Padgett relocated to Florida in 2000 where he now provides the same standard of excellence that he did in Chicago and internationally. His current office is located in Lecanto at the Citrus Memorial Allen Ridge Medical Mall.

He currently is a member of the American Dental Association, Florida Dental Association and the L.D. Pankey Alumni.

Appointment

When you call for an appointment our receptionist will ask certain questions regarding the nature of your problem and dental request in order to allot adequate time for your appointment.

You will also be asked about any previous dental records and x-rays that may be requested by us to eliminate any unnecessary x-rays that may be needed for your appointment.

You will also be asked about any medical conditions such as artificial joints or valves that may require pre medication for your future visit.

We offer financial options as well as submit insurance forms as a courtesy for our patients.

Practice Philosophy

We believe everyone should have the opportunity to go through life with a full set of teeth providing comfort, good function and great esthetics. By providing our patients with a comprehensive examination and diagnosis along with thorough treatment planning, we are able to offer a complete treatment plan, giving patients the necessary options to make educated decisions about their dental health. This includes both the short and long term goals that best serve your needs and desires.

Adding to that, our commitment to excellence enables my staff and to provide our patients with the finest care possible.

Treatment Option and Procedures

Dr. Padgett is a strong advocate of incorporating dental implants and current esthetic concepts into his treatment planning. This enables his patients to enjoy the benefits of beautiful fixed dental restorations that might not otherwise be possible with some patients.

In the past, one of the most difficult challenges in dentistry has been to provide patients who have suffered periodontal disease and partial tooth loss with natural looking fixed type restorations. That has all changed now due to the ease and use of dental implants.

By incorporating dental implants in our treatment we can give our patients back natural feeling, beautiful teeth that are permanently placed.

Here at Citrus Care Dental everything we do is done with our patients comfort in mind.

Our professional staff of licensed dental hygienists, certified dental assistants and our knowledgeable administrative staff help make your experience in our office a pleasant one.
